

BIATHLON

BIATHLON 7-3

BIATHLON 7-4

BIATHLON 7-2 KO

The sporting rifles, model "Biathlon", are intended for biathlon shooting at 50-m range. The "Biathlon-7-3" is preferred for women and juniors, while "Biathlon-7-4" for men.

All models are identical in design but differ in the stock sizes and the trigger position relative to the stock handle. Available are a version for a "left-hander" and a version with a safety.

The barrel bore locking system of a crank type with vertical axes of rotation allows to reload the rifle quickly without changing the ready position of a

shooter. The position of the center of masses in the rifle is adjusted by balancing weights.

Provision is made for some covers to protect the barrel bore, front sight and dioptical sight from dirt.

The trigger mechanism permits to adjust the trigger pull, trigger travel and trigger release character by means of the adjusting screws without stripping the rifle. The mechanism features an additional hammer interlocking device to perform blank training shooting.

The stock adjustable in length by spaces and a cheek adjustable in the vertical and horizontal planes allow it to assume the most favorable and correct position for shooting.

The stock is fitted with a holder to carry extra magazines. The quick-detachable sling consists of two parts - a loop and belt. The shoulder belt is of a peculiar design with elastic components. The rifle is complete with two types of magazines: a standard one holding five cartridges and a magazine with a cover holding three extra cartridges.

The 5.6-mm (22LR) rim-fire cartridges are used for firing. The maximum operating pressure of powder combustion gases should not exceed 180 MPa (1836 kgf/sq-cm). The barrel bore, cartridge chamber and locking unit parameters allow to use both home-made and international cartridges.

The «Biathlon-7-2-KO» ver. «02» «Basic» is a small-bore rifle; the stock made of wood features a pistol grip, butt adjustable in length (development of the stock of the «Biathlon-7-4» target rifle).

	Biathlon 7-3	Biathlon 7-4	Biathlon 7-2 KO
Caliber, mm	5,6	5,6	5,6
